

THE WOLFShadow TRILOGY | BOOK 3

It's been eight years since Zoey's lycanthropic insurrection—known as the Happening—broke out across the country. Werewolves are everywhere and nowhere at once, ignored and disregarded by the media and officially denied by the government. Norm Stockwell, an elite, paranormal counterinsurgency agent, is desperate to reclaim his former life in the face of the ongoing lycanthropic epidemic. Working with members of the secret society of the Synowie Srebra, Norm hunts down the ever-elusive Ansel Rupino in an effort to put an end to the Happening once and for all. All that stands in his way are highly organized pack-gangs of Lupines who prowl the bloody streets of Chicago by the light of the moon, in their relentless, instinctive search for prey.
